PITCH DAY RUN SHEET

27 October 2026: Jack Claybourne and Ashley Palmer

Assumes a 30-minute slot: confirm the real length. Aim to talk for about a third of it; leave the rest for discussion.

Time	Moment	What happens	Material	Who
0-2	**Answer first**	State the core message: V&S can grow toward GBP 2bn at a 10% margin by delivering one Virley experience in every channel.	Slides 1-2	Lead
2-6	**Evidence**	Three numbers only: sales -1.1%, value per sale down 11-15% in three stores, 982k visits worth GBP 5.7m. Hand over the four data cards.	Slides 3-5, data cards	Analyst
6-9	**Reframe and idea**	Problem statement, then Virley Everywhere through the Business, eXperience and Technology lenses.	Slides 6-7	Lead
9-12	**Experience**	Walk the client and colleague journey on the wall; ask Ashley where the real friction sits.	Slide 8, journey sheet	Experience lead
12-14	**Business case**	The margin gap is about GBP 25m; two points of cost closes it. Arithmetic, not a forecast.	Slide 9, workbook	Analyst
14-24	**Co-create**	Invite both leaders to the canvas: reframe, bold idea, test. Scribe on the wall.	Slide 10, canvas	All
24-28	**Decisions**	Three decisions; confirm owners and the next 30 days.	Slide 11	Lead
28-30	**Leave-behind**	Hand over the one-page leave-behind and environment pack.	Printed pack	Lead

Bring

- Laptop with deck, plus a PDF copy
- Printed: leave-behind x4, environment pack x2
- Printed canvas x2, data cards cut out, journey sheet
- Sticky notes, markers, red and green dots
- Adapter, clicker, spare charger
- Workbook open on a second tab for number questions

POLISH LIST

Eleven ways to sharpen the pitch

Drawn from published executive-presentation advice (sources below) and your email brief.

#	Tip	How to apply it here
1	**State the main point immediately**	Open with the core message in the first minute; executives have little time. (IndustryWeek)
2	**Plan to talk for about a third of the slot**	Leaders use the rest for discussion; the co-creation block is your discussion. (IndustryWeek)
3	**Use few slides**	The short deck is 11; consider showing only 6 to 7 and keeping the rest in reserve. (IndustryWeek; your email)
4	**Explain what the data means for their decision**	Never show a number without a so-what. (IndustryWeek)
5	**Limit the data**	Three numbers in the room; the rest sit in the workbook. (SlideGenius)
6	**Frame around the decision they must make**	Three decisions are on the last slide: rehearse the ask. (IndustryWeek)
7	**Know your audience**	Jack: ambition and experience. Ashley: operations, data, cost. (SlideGenius)
8	**Double-check every number**	Run the workbook once more against the data pack images; confirm currency and "profit" definition.
9	**Make it an experience**	Use the data cards, the journey wall and the canvas so the pitch is felt, not read. Add a short client-voice video if time allows. (your email)
10	**Be ready to adapt**	Know which slides to skip for a 15-minute version: keep 2, 5, 7 and 11.
11	**Be bold and authentic**	Say the reframe in your own words and name the risk plainly. (your email)

Rehearsal plan

- **Run 1:** full run with a timer; cut anything over 30 minutes.
- **Run 2:** hard questions from the Q&A prep, answered out loud in 30 seconds each.
- **Run 3:** the co-creation block with a colleague playing Jack and Ashley.
